Drainage pumps made of stainless steel, INOX. These pumps are designed to meet the tough requirements from mines, construction sites, landfill sites and other applications that deal with corrosive water. One application is in mines where the water becomes caustic and destroys conventional pumps in matter of days. The pumps may also be used in applications where saltwater is pumped, like shipyards, fish farms, construction works in harbours and offshore projects. All INOX pumps can handle pH values from 2 - 10. They can also be equipped with zinc anodes for extra protection.

Technical specification

Curves according to: Water [100%], $4 \,^{\circ}$ C, 999.9 kg/m³, 1.569 mm²/s

Configuration

Motor number B8116.390 19-10-2BB-W 6.3KW

Impeller diameter 156 mm Installation type
S - Portable Semi
permanent, Wet
Discharge diameter
100 mm

Pump information

Impeller diameter 156 mm

Discharge diameter 100 mm

Inlet diameter

Maximum operating speed 2820 rpm

Number of blades

Materials

Impeller Stainless steel
